Application/Control Number: 10/574,289

Art Unit: 1754

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5 and 10-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Devos et al. No distinction is seen between the process and product disclosed by Devos et al, and that recited in applicants' claims. Devos et al disclose at col. 2, lines 4-7 that various techniques may be used to purify hydrogen peroxide solutions, including reverse osmosis in combination with other techniques.

Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Devos et al as applied to claim 1 above, and further in view of Minimikawa et al. It would be further obvious from col. 2, lines 36-46 of Minimikawa et al to include UV (ultraviolet light) as a purification technique in the process of Devos et al.

Claims 1-5 and 10-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Minimikawa et al. No distinction is seen between the process and product disclosed by Minimikawa et al, and that recited in applicants' claims. Devos et al disclose at col. 1, lines 51-54 that various techniques may be used in combination for purifying hydrogen peroxide, including a filtration process using a membrane.

Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Minimikawa et al. It would be obvious from col. 2, lines 36-46 of Minimikawa et al to include UV (ultraviolet light) as a purification technique in the process.

Claims 10-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fischer et al or Sugihara et al or Oeter et al. The purified hydrogen peroxide solutions disclosed by Fischer et al, Sugihara et al and Oeter et al would appear to contain less than 1 mg of TOC per kg peroxide solution.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 4, "type" renders the scope of the claims vague and indefinite. In claim 5, 6 and 8, "chosen from...or" and "chosen from...and/or" are improper alternative language. In claim 10, it is indefinite as to whether the solution would necessarily have the properties obtained by the process of claim 1, since the

Application/Control Number: 10/574,289

Art Unit: 1754

claim recites that the solution is "obtainable" (rather than obtained) by such process.

Also in claim 10, "An…solutions" is ungrammatical and therefor indefinite.

The specification and Drawings are objected to under 37 CFR 1.84(u)(1) in referring to the sole figure as "Figure 1".

The other references are made of record for disclosing various methods for purifying hydrogen peroxide.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
